HOW AN AUCTION SALE WORKS

Perhaps you have wondered just how my auction sales of coins really work. If you have, this is what happens.

A large collection or a group of small collections are consigned by their owners to be sold at the best prices possible. I then assemble the coins in a reasonable order, making lots of one or more coins, as I determine the buyer will prefer. I then describe and catalog the lots, valuing them on a sensible basis and have picture plates made for some of the outstanding pieces. Several thousand catalogs are printed and mailed to prospective buyers. Each catalog has a BID SHEET for the buyer to use along with a return envelope.

When the BID SHEETS are received they are numbered in the order of their receipt and the bids posted in a master BID BOOK. On the date of the sale, the BID BOOK is checked and the high bidder, at a normal advance over the second high bidder, has his bids offered against the floor at the public sale.

At the Public Sale, the master BID BOOK bids against the floor bidders present in the auction room on the sale date.

Valuations are estimates of the value of each lot. They are sometimes less than catalog values because of condition. Often they are the standard catalog value. Frequently they are higher or much higher because current markets for these rarities far exceed the values given in available reference works.

A final word — the offering of ridiculously low bids that are only 10% to 20% of the estimate of value is a waste of time. Many dealers place a standing order for various types of material at prices ranging up to 100% or more of the estimates.

Govern yourself accordingly, and do enjoy this great hobby.

On July 30, 1715, eight galleons of the Spanish Plate Fleet were smashed to pieces on the East Coast of Florida by a hurricane and two more ships were sunk without a trace. One ship escaped the fury of the storm. Robert I. Nesmith in his "DIG FOR PIRATE TREASURE" sets forth the account of this and many other wrecks. This book by my good friend Bob, who is often called the "Old Pirate", may be ordered from me at \$6.00.

PILLAR DOLLARS OF MEXICO

In 1732 the first SPANISH MILLED DOLLARS and their fractions were struck in the Mexico mint. These classic pieces are the ancestors of the United States system of coinage, as well as those of a good part of the rest of the world. Many of the specimens offered here are the pieces that Sr. José Yriarte used in the preparation of his catalog of Spanish and Spanish American Silver Dollars. While the coins of 1732 are the rarest in the series (except for a single known specimen of the 1772 dos-mundos dollar), individual types of the four different 1733 milled coinages may be even more rare.

PHILIP V

- 290 1732 8 Reales, Assayer F. Yriarte 403. This magnificent coin is from the Yriarte collection and is probably the finest specimen known. Based on fragmentary sale records to be found, this beauty may reach well into four figures. 27.00 grams. Superb. **PLATE**
- 291 1733 8 Rs. F. Mintmark MX, not Mo. Y. 406. With wear evident only in the center of each side, this is otherwise extremely fine. This may be the finest known of this variety, of which fewer are known than of the 1732 date. Ex Yriarte. 26.92 grams. (1000.00) **PLATE**
- 292 1733 8 Rs. MF. Mintmark MX, not Mo. Y. 406A. There are as few specimens known of this beautiful rarity as there are known of its twin, the 1733 MX F. Because of condition this should realize slightly more than the preceding coin. Ex Yriarte. Superb. 27.03 grams. (1100.00) **PLATE**
- 293 1733 1 Real, MF. The Pillar Bit with the extremely rare MX mintmark. Fine-Very Fine. (75.00) **PLATE**
- 294 1733 8 Rs, MF. Mintmark Mo. Y. 405A. This gem is as close to uncirculated as one can expect in a piece more than 229 years old. More often seen than the previous rarities, it is still rare, particularly in this condition. Ex Yriarte. 26.94 grams. (450.00) **PLATE**
- 295 1734/3 8 Rs, MF. A choice example of the first Pillar Dollar overdate that one can expect to find. A very scarce coin. Ex Yriarte. 26.81 grams. Extremely Fine. (200.00) **PLATE**
